

We supply all the steel ...for offshore applications ...

ThyssenKrupp Mannex as an internationally operating trading company offers steel tubes and pipes, rolled steel and products of the technical business sector, in particular machines, industrial plant and equipment, steel products for offshore applications and marine structures. Our worldwide sales network of 25 company-own locations abroad and 23 outside agencies guarantees today's essential global market presence.

In the face of a fierce competition on international markets, our strengths are a profound knowledge of products and markets plus the additional asset of a comprehensive service range with optimum logistics and tailor-made financing schemes.
